ACKNOWLEDGEMENTS TO THE REVIEWERS

of the manuscripts submitted to the Editorial Board of the Journal in 2012

On behalf of the Editorial Board of *Economic Horizons* and in my own name, I would like to thank the reviewers for their having made an effort to provide the critical evaluations of the manuscripts submitted to the Editorial Board of the Journal during 2012. The broadest variety of the relevant problem areas of economics, business economics, management and different multi- and interdisciplinary domains corresponding to the thematic areas of the Journal were encompassed by the research subjects of the concerned manuscripts. At the same time, in their research, the authors of the manuscripts were relying on different theoretical, methodological, and methodical foundations. Therefore, and considering the editorial policy of the Journal aimed at the continual improvement of the quality of the published contributions, the engagement of the competent members of the academic community, specialized in the considered problem areas, was deemed to be necessary in the peer-review processes. Taking into account the key criteria for evaluating and classifying the manuscripts (their relevance in a theoretical, methodological, methodical, and practical sense, their impact, originality and clarity), our reviewers – listed below – with their own critical and constructive comments, remarks, proposals and guidelines, helped the authors to improve their manuscripts and supported us in our endeavors to enhance the quality of the Journal through the more and more demanding manuscript double-blind peer review process.
